EC/ppm levels are based on using RO water.

**CHOOSE YOUR SILICON**

<b>Pro-Silicate</b>	1 mL	2 mL	4 mL	4 mL	4 mL	4 mL	4 mL	4 mL	4 mL	4 mL	4 mL	-
<b>GroSilic</b>	0.3 mL	0.5 mL	1.3 mL	1.3 mL	1.3 mL	1.3 mL	1.3 mL	1.3 mL	1.3 mL	1.3 mL	1.3 mL	-

**\*Monster Bloom volume measures:**  
0.4 g/gal = 1/3 tsp per 5 gallons  
0.8 g/gal = 2/3 tsp per 5 gallons

**TIPS + TRICKS:**

**#1:** To get the most from a living soil, amend your growing media with:  
Synergy - 0.2 oz. per 5 gal of media  
Biofuse - 0.25 oz. per gal of media  
Black Pearl - 8 TBSP per gal of media

**#2:** Pro-Silicate and GroSilic are effective for increasing pH. If adding after other fertilizers be sure to pre-dilute in water to avoid fallout.

**#3:** Feed your plants once a week, allowing for 10% - 15% run-off.
