

CANNABIS CULTIVATION WITH SUPERthrive VITAMIN SOLUTION

SUPERthrive is a vitamin solution containing kelp and vitamin B1, used for over 50 years by soil and hydroponics growers of all types. Our highly concentrated, non-toxic vitamin formula maximizes each plant's potential by helping establish and maintain a strong root base. SUPERthrive works with all hydroponic systems and mediums and is the perfect addition to your nutrient regimen be it natural, synthetic, or aquaponic. For any plant type, through all growth stages.

DOSAGE AND INSTRUCTIONS

- **Cloning, Mother Plants, Transplants, Stressed Plants:** 1 tsp. per gallon; 12 oz. per 100 gallons
- **Grow (1 - 6 weeks):** ¼ tsp. per gallon; 3 oz. per 100 gallons
- **Bloom (8-10 weeks)** ¼ tsp. per gallon; 3 oz. per 100 gallons
- **Flush (last week):** ¼ tsp. per gallon; 3 oz. per 100 gallons

Use in tandem with your nutrient program.

BENEFITS

- **Motherplant Vigor:** Boosts health of motherplants, increasing health and survival rates of clones and tissue cultures. Increased survival rates and performance lets you choose from the best of your cutting stock.
- **More Cycles:** Increased growth rates decrease growth time.
- **Bloom:** Helps plants resist heat and other stresses.
- **Flushing:** SUPERthrive helps your harvest finish strong, Osmotic stress caused by the change in PPM is minimized. Helps plants perform under the most stressful part of their lifecycle.
- **Integration:** SUPERthrive's unique formula compliments all nutrient regimens.
